## NEWS RELEASE

Wednesday, September 2, 2020, 1:45pm, News Release no. 125

### Coronavirus COVID-19

**LOCAL RISK FACTOR: Medium**

#### UNALASKA COVID-19 CASE COUNT:

COVID-19 tests performed locally	1,741
Cumulative positive persons tested locally	101*
Current active cases	3

*The number of cumulative positive persons tested locally includes the 85 persons from the fishing vessel American Triumph and the 1 person employed on the State Ferry Tustumena, who all left the island shortly after testing.*

**STATE OF ALASKA CASE COUNT** Source: <https://coronavirus-response-alaska-dhss.hub.arcgis.com/>

	Resident	Non-Resident	Total
Cumulative Cases	5,364	869	6,233
Recovered Cases	2,085	196	2,281
Active Cases	3,240	673	3,913
Cumulative Hospitalizations	225	5	230
Deaths	39	0	39
Unalaska (Aleutians West)	6	86	92*

*\*The total reported by State DHSS for Unalaska doesn't match the cumulative positive persons tested locally because some of those individuals may have previously tested positive before arriving in Unalaska, so were not counted as an additional positive person by the State; or because of other intricacies in how the State tracks cases.*

**COVID-19 SYMPTOMS:** People with COVID-19 report a variety of symptoms, which can range from mild to severe, including:

- Fever or chills
- Cough
- Shortness of breath
- Difficulty breathing
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Symptoms may appear 2-14 days after exposure to the virus. Even if you have mild symptoms, it is recommended that you get tested for COVID-19 so that spread of the virus can be minimized. Drive up testing is available at the local IFHS Clinic. Please call first and request a screening appointment with a provider. The number is 581-1202.
